Subject: Sampling Event at Falcon Refinery
Date: Thursday, July 17, 2014 2:50:00 PM

Dear Mr. Carroll

EPA and its contractor EA Engineering, Science and Technology are working on the logistics to finish the sampling for the Remedial Investigation at the Falcon Refinery Superfund. We will be collecting additional soil samples at AOC 1 and AOC 2 as well as resampling the monitoring wells that were installed last September. We expect that the sampling event will only take 1 week and currently looking either the week of Sep 15 or Sep 22.

Thanks

Brian W Mueller RPM
